## A. Introduction

King Fahd University of Petroleum & Minerals provides an opportunity to faculty members (including RI research engineers/scientists) to spend their sabbatical leave in a reputable academic and/or research institution. Sabbatical leave is a privilege and is granted only when it can be shown that the applicant is capable of using this period in a manner that will thereafter increase the applicant's effectiveness to KFUPM. The sabbatical leave guidelines aim to inform a faculty member who intends to apply for sabbatical leave about all related issues. It focuses on the main objectives, eligibility, proposal preparation and evaluation, and the procedures for processing the sabbatical leave application. The guidelines also provide details on the report to be submitted upon return from the sabbatical leave, the process for evaluating the report and what the University expects from the sabbatical leave. The sabbatical leave is expected to benefit all parties by rejuvenating the faculty member, broadening the department's expertise, and enhancing the University's reputation.

## B. Objective

The main objective of the sabbatical leave is to provide KFUPM faculty with a change of atmosphere in order to pursue scholarly activities and to furnish a better environment for academic recuperation and rejuvenation. The sabbatical leave also provides the means to interact directly with scholars in reputable academic and research institutions. The following are considered as scholarly activities for the purpose of sabbatical leave:

1. To pursue, extend or diversify ongoing research;
2. To initiate and pursue research in new areas;
3. To work in industry in the area of research and development; the aim of spending sabbatical leave in industry is to develop applied research-oriented expertise, to develop expertise in practical oriented course(s) or to create an engineering design or product; and
4. To write a research-oriented book or a research monograph.

During the leave, the faculty member is expected to interact with academicians and/or researchers in other institutions with the view of developing his expertise. The faculty member is also expected to contribute to the literature in his field by publishing in reputable journals. In general, faculty members on sabbatical leave are encouraged to attend scientific meetings, conferences, teach courses, present seminars in host institutions as well as in nearby institutions. This will promote KFUPM's international standing.

All of the aforementioned activities must be relevant to the faculty member's academic development and in accordance with the needs of his department, the University, and the Kingdom. **KFUPM supports and encourages collaboration with leading Universities only.**

## C. Eligibility

KFUPM Saudi faculty and RI research engineers/scientists are eligible to apply for sabbatical leave after serving the University for a period of at least five years. The faculty member must agree to return to KFUPM for at least one academic year of service after the termination of the sabbatical year, otherwise, he has to repay any compensation (Salary plus any other expenses paid by the university during the sabbatical year).
